-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Martin (USPN 2,805,639).

In reference to claims 1, 4, 6, 9-11, 14-26, Martin discloses a weighing and flavoring system for producing bags, comprising: a measurer for measuring a quantity of articles (4); a flavoring apparatus (5d, 8) including an Archimedean screw; and a packager (13) for packaging the flavored articles. Martin does not disclose the use of a control or setting means for checking the quantity of flavored articles after packaging. Kammler et al. teaches a measuring and packaging system having a measurer (30) for measuring the quantity of articles, a check measurer (17) downstream of the measurer (20); vertical form, fill and seal packager; a control or setting means (31) for setting at least one threshold value based on the quantity of articles (column 4 lines 27-31); and a sorter (39) for sorting articles based on the quantity of articles measured by the check measurer (17). It would have been obvious to one having ordinary skills in the art to

modify the system of Martin to include the measuring and packaging system of Kammler et al. for the purpose of ensuring a proper quantity of flavored articles are packaged.

With respect to the claims 2, 3,5, 7, 8, 12 and 13, the claim limitations are drawn towards the functionality of the setting and control means. Based on Kammler et al. disclosure of using a computer control and setting means, it is found that the control means of Kammler et al. is capable of providing the functions as claimed by Applicant.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.
